JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

In Batavia, Genesee County, 21 cases with two deaths are reported as having occurred from August 26 to September 26.

The reports received from various other localities, while indicating an unusual prevalence of poliomyelitis throughout western New York, are not sufficiently complete to warrant a numerical estimate. The State department of health is, however, taking active measures to obtain full records of all cases.

TETANUS.

CASES AND DEATHS REPORTED BY CITY HEALTH AUTHORITIES FOR THE WEEK ENDED SEPT. 21, 1912.
